

Save time & money

PASSIVE VIDEO BALUN

Features

- No need to provide power
- Screwless Terminal Block reduces wiring time
- Male BNC with extended 17.5cm pigtail
- Built-in transient protection
- Transmission distance of color signal via CAT5 or CAT6 Up to 300m (1000ft) with passive balun

why do we need to use baluns?

Passive video baluns are perfect for running your security camera video over a CAT5 cable. Transmit color video up to 300 m (1,000 ft) using only a single pair of wires. Can transmit 4 cameras with only one CAT5 cable. No crimping required, simple to use screw terminals, small, reliable and cost effective. BNC lead for easy connection to your digital video recorder or other devices.
